

Solar quote checklist

Bring this to every quote you compare. If a line is blank, ask the installer to fill it in writing before you pay anything.

Solarman PH

Solar quote checklist · solarmanph.com

	THE QUOTE MUST NAME	QUOTE A	QUOTE B
☐	Module brand and model Which company made the panels, the exact model, the wattage of each panel and how many.		
☐	Inverter model Brand and exact model number of the inverter (and battery, for hybrid: brand, model, usable kWh).		
☐	System size in kW Total array size in kW, and how it adds up: number of panels × wattage.		
☐	Warranties Module warranty (product and performance), inverter warranty, and the installer's workmanship warranty, each with years and who honors it.		
☐	Exclusions Everything the price does not include, in writing: e.g. roof repair, meter pole, extra cable runs, battery unless named.		
☐	Permits Which building and electrical permits are included, and who files them with the LGU.		
☐	Net-metering filing Whether the net-metering application with the utility is included, and who handles the bi-directional meter process.		

A price with no brand is not a quote.
